

Still some 2dvd problems

Submitted by Patrick.Gatlin on Sat, 2013-05-04 09:20

Date:

Saturday, May 4, 2013 - 08:45

Instrument List:

- [Yellow](#)

Discussion:

SN70 stopped collecting data at 03:07 UTC (data collection restarted at 1330 UTC)

SN38 still down due to video camera problems

SN37 running properly with no data outages (4 May rainfall total: 22.7 mm of rain through 1300 UTC)

SN36 - no remote comms

SN35 - running properly with no data outages (4 May rainfall total: 16.2 mm of rain through 13:57 UTC)

SN25 stopped collecting data late Friday (2 May), but looks like cameras collected data so it may be a synchronization issue. I will ask Joanneum we can patch together the missing HYD file(s) from the past 2 days.

A site visit will be done to SN36 and SN25 today to further investigate the problems and get data collecting going again.
