Instrument List:

- [Green](#)

Discussion:

We are unable to communicate with the laptop for SN37. This could be an issue with weak cellular signal. However, it is also possible that the laptop has crashed or power may have been lost. The site will be visited tomorrow.

The other 2DVDs are operating normally

UPDATE

Remote communications to 2DVD SN37 was restored this afternoon. The instrument has been operating normally without any interruptions. A weak cellular signal is creating a bottleneck with data uploads for SN37, APU05, 06, and 08.
