Instrument List:

- [Green](#)

Discussion:

06/03/13 - Checked calibration of SN 38, 37, 35 and 25. All but SN25 were calibrated correctly.

Performed plane test on SN25. It is now within calibration standards.

06/04/13 - SN25- Dropped offline at 0000 UTC. Was able to restart it and it is now collecting data.

All other 2DVDs are operating and collecting data.
