Thursday, June 6, 2013 - 11:00

### Instrument List:

- [Green](#)

Discussion:

1. The remote communications link to XPOL-2, which was lost around 20130606-0816Z, has been restored starting 20130606-1500Z. There hasn't been any significant precipitation in the XPOL-2 coverage region during the period we did not have remote access to this radar.

2. XPOL-2 has been in surveillance mode now starting 20130606-1605Z.
