

## XPOL-5 Status Report (Green)

Submitted by KumarVijayMishra on Fri, 2013-05-31 12:17

Date:

Friday, May 31, 2013 - 11:00

### Instrument List:

- [Green](#)

Discussion:

(Contd. from last XPOL-5 report)

1. We continue to work with Cedar Rapids airport authorities to enable remote access to XPOL-5 radar. The firewall issues at the end of the airport computer support have not been resolved yet. Nonetheless, we have been periodically visiting the radar to monitor its operation.

2. On the afternoon of Mon May 27, the radar had a power outage at 20130527-1921 UTC. The radar was put back in standby mode on the morning Wed May 29 (Tue May 28 was no precip day), and back in campaign scan mode on Wed May 29 at 20130530-0312UTC.

3. Another visit to XPOL-5 is planned today to monitor its operation and also copy the data. Some of the sample data from first few scans has already been shared in the previous XPOL-5 post.

UPDATE: During onsite visit today, it was found that the radar had a power outage at 20130530-0329 UTC. The radar is back online in campaign scan mode since 20130531-2356 UTC.
