Saturday, May 11, 2013 - 16:15

Discussion:

09:00 Briefing everyday Operations are implicit Update Mission Science and Instrument Science reports daily Events: NPOL likely down on Sunday (5/12), possibly part of Monday (5/13) for some brain rest. Will be ready for Ops Tuesday. Need to keep on the data processing issue on site for pushing products (Dave/Nathan coordinating) and then reprocess to fill in for last few cases (as possible). X-band drop off at NPOL site on Monday morning (Witek and Mike coordinating) Keep up the excellent work! .
