

## Plan of the Day for Tuesday, 21 May 2013

Submitted by rutledge on Tue, 05/21/2013 - 09:28

Date:

Tuesday, May 21, 2013 - 09:30

Discussion:

The forecast calls for dry conditions in the IFLOODS area for the next 24 hours. This is a bit welcome since the last 3 days were rather busy, resulting in excellent cases for IFLOODS.

Instruments will continue their normal operations today just in case there is a rogue shower or two.
