Discussion:

Operate till 0500 UTC on 6/16 (23:59:59:9999999... CDT on the 15th) and it's a wrap! We will next focus on dataset QC, product prep and upload to portal. Target for datasets (raw) is ASAP. Target for QC'd data and products, NLT 15 December 2013. Finally, many many thanks to all of you for such a really professional effort and great team approach. Now let's work the GV science objectives with the data! cheers, Walt
