- [APU](#)

Flight Date:

Wednesday, June 1, 2011

Status:

Yellow

14 of 16 APUs are currently collecting data.

APU01: The spare battery and the battery in the unit are both bad. An attempt will be made to get it up and running at least for the duration of the precipitation.

APU05: The hard drive in the unit crashed. It will be restarted today before the precipitation.
