The objective for this flight was land surface moisture data coincident with satellite overflight. The aircraft took-off and completed the flight plan pattern on time and without issue. HWRAP and CoSMIR report good data sets. AMPR is pending post flight analysis at MSFC. Early problems with the REVEAL system were resolved prior to the beginning of the first data line and the system functioned for the remainder of flight. There are no aircraft issues and we are go for the next flight.
