- [ER-2](#)

Date:

Fri, 04/22/2011

ER-2 will plan to be over Norman OK at 22Z and expect about 90 mins of research time in that area. UND will standby. We will talk to them periodically today. Their plan might also to be at altitude near Norman at 22Z. We will try to do coordinated sampling of anvils expected to develop ahead of isolated storms. OU Prime to come up by 1930 Z. Soundings will be at 3 hr intervals. SGP facilities continue to work to being full up for an expected big event on late Sunday into the overnight hours.
