

Plan of the Day, 27 April 2011, 1500Z

Submitted by srutledge on Wed, 04/27/2011 - 10:03

Date:

Wed, 04/27/2011

Based on the forecast, we will stand down the aircraft the remainder of the day (obviously).

Ground based facilities will continue their 24/7 operational mode. The possibility of a ER-2 instrument test flight for Friday is being discussed, as a result of the HWRAP and AMPR instrument problems encountered on last night's flight. Next briefing at 1400Z Thursday, 28 April 2011.
