Down day for ER-2, Citation. No weather (cu/sc field but can't fly it anyway). Ground instruments as yesterday.

AMPR and CoSMIR work ongoing today through weekend at Offutt.

Tony Grainger takes over as Citation Mission Manger today for Mike Poellot. Chris Jennison is new MM for ER-2.

Forecast looks pretty similar for next few days- improving perhaps by Tuesday-Wednesday as Pacific trough begins its approach. From forecast looks like nice events later in the week.

Continue organizing the science discussion for Monday afternoon 14:00.
