Mon, 05/30/2011

Citation will do a DOE cloud mission at the CF, launch at 1230 CDT. No updates on readiness for flying precipitation.

ER-2 is scheduled to launch at 02 Z (2100 LT). Mission science will have a briefing at 1400 LT at the Fairfield Inn to discuss the mission tonight due to anticipated poor takeoff/landing conditions at KOFF. If tonight's flight is scrubbed, we will tentatively launch at 18 Z tomorrow to fly convection along a cold front in TX/OK/KS.
